Jakarta, 13 Mei 2003 | Kec. Cilandak, South Jakarta, DKI Jakarta

Informatics Engineering graduate with a strong specialization in Full Stack Web Development. Experienced in building end-to-end web applications, from wireframing in **Figma** to developing responsive frontends with **React.js** and managing databases using **SQL**. Proven track record in developing a design system for Jakarta LRT and managing IT infrastructure for 100+ users. A structured and communicative professional with a unique blend of technical development skills and operational **IT Support** expertise, ready to contribute to complex software projects.

Work Experience

Muda Group July, 2024 – Sept, 2025

Full Stack Developer | Freelance

- Engineered and deployed two comprehensive web solutions independently, covering both frontend and backend development to meet client business requirements.
- Developed a responsive Company Profile website using React.js and Tailwind CSS, focusing on high-performance UI/UX and seamless information delivery.
- Architected a Product Catalog system for a furniture business, integrating a database to manage and display extensive product inventories efficiently.
- Managed the entire software development life cycle (SDLC), from initial wireframing in Figma to final deployment and database configuration.Implemented optimized web structures to ensure fast loading times and cross-device compatibility, enhancing the digital presence of the client.

PT. LRT Jakarta March, 2024 – July, 2024

Web Developer and IT Support | Internship

- Developed a responsive design system to ensure optimal accessibility of Jakarta LRT schedule and route information across various devices (mobile, tablet, and desktop).
- Responsible for routine maintenance, bug fixes, and technical SEO optimization to ensure the website remains stable and easily found by the public.
- Conducted an inventory of IT assets, including over 100 laptops, 100+ IP Phone users, 20+ external hard drives, and 10+ access points for audit purposes.
- Handled the installation, restart, and inspection of employee work equipment, as well as routinely monitoring the server room temperature in accordance with operational standards.

Education

Sultan Agung Islamic University Aug, 2021 – Oct, 2025

Bachelor – Informatic Engineering | Grade: 3,61/4,00

Relevant Course: Web Developer, Database, Software Engineering, Computer Networks, and Information System.

Thesis Title: Detection of nutritional deficiencies in iceberg lettuce plants using autoencoder and multilayer perceptron methods.

Skills

Hard Skills: HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, React.js, Vite.js, Node.js, SQL, Vercel, and Prompt AI.

Soft Skills: Effective communication with teams and customers, time management and work prioritization, problem solving.

Software: Visual Studio Code, GitHub, Canva, Figma, and Microsoft.

Languange: Indonesian (Native), English (Intermediate), and Javanese (Intermediate).

Volunteer Experience

Student Association – Semarang March, 2025 – May, 2025

Education Teacher | Volunteer

- Served as a speaker at the Introduction to Website Development event for Informatics Engineering Student Association members.
- Presented basic website development materials, including HTML structure, CSS concepts, and basic web logic.
- Helped participants understand the website creation workflow systematically and effectively.
- Improved members' technological literacy through a communicative and interactive learning approach.

Student Association – Semarang Jan, 2025

Special Education Teacher | Volunteer

- Appointed as a Technical Speaker to deliver fundamental website development materials for all Informatics Engineering Student Association members.
- Educated participants on Fullstack core concepts, covering HTML structures, CSS styling, and basic web logic to establish a strong technical foundation.
- Guided members through systematic web development workflows, ensuring a comprehensive understanding of how to build websites from scratch.
- Facilitated interactive learning sessions to improve technological literacy through a communicative and practical approach.

Student Association – Semarang Juny, 2024

Motivational Speaker | Volunteer

- Served as a keynote speaker for the "Tips & Tricks for Independent Internship Applications" socialization event organized by the Informatics Engineering department.
- Empowered students with effective strategies for searching and applying to independent internship programs, focusing on industry-standard selection processes.
- Shared professional insights and experiences regarding recruitment selection and successful adaptation to the tech industry.
- Facilitated a mentorship-style session to equip fellow students with the necessary tools to navigate the transition from academia to professional environments.

Organizational Experience

Informatic Engineering Student Association Nov, 2023 – Dec, 2024

Staff Research and Technology

- Coordinated multimedia and documentation for various major student association and faculty events.
- Served on event committees as both coordinator and field member.
- Led technology-themed informatics training sessions with dozens of participants and committee members.
- Responsible for the development and management of the Informatics Engineering Student Association's official website.

Certificate

- IT Support Internship – PT. LRT Jakarta (2024): UI/UX design and official website development, IT asset inventory and audit, installation and maintenance of employee work equipment, and server room operational monitoring.
- Fullstack Web Development – PT. Impactbyte Teknologi Edukasi (Skilvul) (2023): UI/UX design from wireframe to prototype, frontend development using HTML, CSS, JavaScript, and React.js, and database management using SQL and NoSQL.
